

Big Picture

Here's the deal. We're all about helping biologics researchers break free from tools that just don't cut it. Unleashing problem-tackling products that make a huge difference in the real science they do every day. That's our mantra, our promise and we own it. We live by an unconventional strategy for a start-up: we're buying commercial businesses and developed technologies, adding our magic touch to turn them into breakthrough products, investing massively in customer-facing teams and then selling those products like gangbusters.

Portfolio

We have 9 game-changing product lines that provide researchers with the right tool for the job.

- Lunatic – the concentration liberator
- Uncle – the first all-in-one biologics stability platform
- Hunky – the first hi-def stability quantifier
- Punk – the smallest, fastest and easiest to use protein sizing system
- Grunt – the world's first automated formulation preparation system
- Freeslate – the most configurable end-to-end automated workflow solution
- Junior – the most configurable bench top workflow solution
- Hound – the particle identifier
- Bouncer – the silicone protector
