

## Unchained Labs marches out the GRUNT

March 14, 2016 – Pleasanton, CA – Unchained Labs, the life sciences company that's all about getting biologics researchers the right tool for the job, today launched the GRUNT, the world's first automated formulation preparation system. The GRUNT is the latest addition to Unchained Labs' product line up, the 4th in less than a year.

The GRUNT unchains researchers from the time-consuming, old-school processes for making biologic formulations. Common steps like buffer prep, exchange, dialysis and sample concentration for a formulation screen can take days – and it's all manual. With the GRUNT, scientists only spend 20 minutes on set up, picking buffers, entering parameters and loading lab wear. The GRUNT handles everything else. It does all the dirty work so they can focus on the big stuff.

"Hands-off protein formulation with the GRUNT lets scientists focus on solving key challenges instead of watching the clock for when they need to change out a buffer or get to the centrifuge. It also records every step of the process and cuts down on their documentation time," said Taegen Clary, VP of Marketing at Unchained Labs. "The GRUNT lets our customers whip out more formulations than ever before, and more of those conditions can be characterized with our UNit, HUNK and pUNK systems. So we're majorly upping a researcher's odds of finding the best biologic formulation faster."

### About Unchained Labs

Here's the deal. We're all about helping biologics researchers break free from tools that just don't cut it. Unleashing problem-tackling products that make a huge difference in the real science they do every day. That's our mantra, our promise and we own it. We're located in Pleasanton, CA and can be found online at [www.unchainedlabs.com](http://www.unchainedlabs.com).
